Synopsis
Medico-practica

Quae Medicus interrogare debet ab aegro & assistentibus

Hippocrat. Lib. 3 de affectionibus textu 36 rem ita definit cum ad aegrotum veneris interrogare oportet.

1 quo patiatur
2 & qua causa
3 quot iam diebus
4 an venter secedat
5 & quo victu utatur

quae ea explicat Claudinus cap. 2 Lib. 1 de ingressu ad infirmos et quaestionibus

Hippocratis Iusiurandum

Per Apollinem Medicum & Aesculapium Hygieiamque & Panaceam iureiurando affirmo & deos quoque omnes testor, me quantum viribus & iudicio valere potero, quodcunque iuro & scriptis spondeo esse observaturum.

Praeceptorem quidem qui me hanc artem docuit Parentum loco habiturum, eique me victus, etiam vitae quae usu venerint communicaturum & suppeditaturum, eiusque posteros apud me eodem loco quo germanos fratres fore, eosque si hanc artem addiscere volent absque mercede & syngrapha edocturum.

Praeceptionum quoque & auditionum totiusque reliquae disciplinae meis & eius qui me docuit liberis, tum discipulis qui Medico iureiurando nomen fidemque dederint participes facturum, aliorum praeterea neminem.

Victus quoque rationem quantum facultate & iudicio consequi potero aegris utilem me praescripturum eosque ab omni noxa & iniuria vindicaturum.

Neque vero cuiusquam precibus adductus alicui medicamentum lethale propinabo neque huius rei author ero.

Neque simili ratione mulieri pessum subditiuum ad foetum corrumpendum exhibebo, sed castam & ab omni scelere puram cum vitam tum artem meam perpetuo praestabo.

Neque vero calculo laborantes secabo sed Magistris eius artis peritis id muneris concedam.

In quamcunque domum ingressus fuero. ad aegrotantium utilitatem ingrediar ab
omnem iniuriam inferendam et corruptelam aliam maxime prorsus fugiens. tum

Modus Consultandi Medicor. Monspeliens. & Parisiensium

Omnis consultatio medica tribus praesertim capitibus absolvitur

1 Diagnosi
2 prognosi — quibus simplex ac nuda affectus historia praemittitur
3 therapia

Diagnosis 1

Exponit statum aegri vel naturalem vel neutrum vel Morbosum

In naturali VI considerantur 1 natura aegri individualis seu Temperies. 2 naturalis principum partium constitutio 3 conformatio structura & situs partium in utero 4 aetas cuius consideratione variantur Temperamenta morbi remedia 8°. Consuetudo tandem & sexus regio & victus alimenti ratio

In neutro videndum num ante decidentia disponatur ad pro sanitatem an convalescentia status restaurationem sanitatis & reddenda praecautionem. an denique dispositione valetudinarios ad affectus haereditarios aut jam acquisitos status προφυλακτικόν

In morboso considerantur morbi, pathos affectus, symptomata & causae morbificae

Ratione morbi considerantur 1um an ille sit intemperies praeter conformationem vel soluta continuitas. an simplex et compositus aut complicatus. an externus internus vel univocus an haereditarius an acquisitus. an venenus aut immediatus an symptomaticus vel dispositivus &c. 2° in qua differentia temporis generalis an 3° in principio augmento statu vel declinatione constitutus quod ex continue vel remittente humorum violentia ac remissione symptomatum cognoscitur. 4° in qua differentia temporis specialis seu paroxysmi accessionis signa pathognomonica ἐπιγινόμενα & ἐπιφαινόμενα

Pathos affectus ex subiectis deprehenduntur. Subiectus 1 leviter ... actio laesa ut depravata respiratio vel Haemoptoë vel ... aut sanie 2 situs & dolor solidus ... 3 doloris proprietas ut punctorius membranas ... 4 excreta sanguinis floridus per tussim rejectus pulmones ulceratos 5 accidentia propria ut dolor lateris punctorius plenitudinis puris rejectio ulcus.

Symptomata vel respiciuntur ad actionem laesam vitalem ...

naturalem actualem cum ipsa aut diminuta fuerit aut depravantur
aut abolentur. Vel ad qualitates mutatam colores sapores odores
sonos et Tactiles. Vel ad dolorum [illegible] ratione ipsorum qui sub
[illegible] quantitates qualitates [illegible] de noticiis

Causa denique vel formalis seu essentia ipsa morborum vel
materialis in qua est pars affecta. aut de qua [illegible] humores [illegible]
[illegible] et [illegible] morbi generatur. vel efficiens externa
aut interna. mediatam proxima et continens aut imme
diatam remota aut per ~~accidens~~. antecedens. primaria
aut per se [illegible] primaria aut per accidens. prin
cipalis ~~aut~~ propria aut [illegible] vel adiuvans. actu agens aut
potentia

Progressio 2

Progressus diagnosis sequitur et in agendis indicat morborum

1 Longitudinem aut brevitatem
2 Salutem aut exitium
3 medium salutis aut mortis

Longitudinem et brevitatem prodi[illegible] ex diuturnitate
morbi et causa

Ex morbo siquidem Acuti omnes breves sunt ut apoplexia

senes &c. indicantur in calidis vel frigidis aliis assistentes tempore autumni post calidas aestates aut hyberno post solstitium [illegible] grandes [illegible] post 4 menses 2 modo quod insigne in [illegible] symptomata aut genus morbi multum a proprio naturali statu recesserit quoniam ex Hippocrate sect. 2 aph. 34 in iis morbis minus illi periclitantur quorum naturae aut aetati aut temperamento aut habitui similes affectus existunt quam multum contrario dissimiles morbi quorum affectus cum nullo istorum conveniunt

Modus benignae solutionis seu crisis aut mortis signat quomodo morbus terminari debeat an per crisim aut paulatim per resolutionem

Crisim perfectam tria efficiunt humorum morbificorum coctio separatio et expulsio. Haec autem fit duobus modis κατ' ἔκκρισιν per evacuationem et κατ' ἀπόστασιν sive per abscessum

per evacuationem [illegible] humor morbificus extra corpus [illegible] ut per [illegible] urinam, sudorem, [illegible] haemorrhagia, menstruum profluvium et haemorrhoides

per abscessum vero ab affecta parte morbificus humor transfertur in aliam fit autem duobus modis [illegible] vel κατ' ἀπόστασιν [illegible] majori ab nobiliori parte [illegible] per [illegible] [illegible] ab [illegible] partibus ad [illegible] a nobiliore ad ignobiles

Aphorismi H. Communes

Sectio 1ª

1

Vita brevis, ars vero longa, occasio autem praeceps, experimentum periculosum, iudicium difficile. Nec solum se ipsum oportet praestare opportuna facientem, sed et aegrotum et assistentes et exteriora.

2

In perturbationibus ventris et vomitibus sponte factis, si talia purgentur qualia purgari oportet, confert et facile ferunt; sin minus, contra. Sic et vasorum inanitio, si talis fiat qualis fieri debet, confert et bene tolerant; sin minus, contra. Inspicere itaque oportet et regionem et tempus et aetatem et morbos in quibus convenit aut non.

3

Habitudines athleticae quae ad summum bonitatis attingunt periculosae, si in extremo constiterint. Non enim possunt in eodem permanere neque quiescere; quoniam vero quiescunt neque possunt proficere in melius, relinquitur ut in deterius. Harum de causa bonam habitudinem solvere expedit confestim, ut rursus nutrimenti recipiat principium. Neque compressiones ad extremum ducendae, periculosum enim; sed qualis natura fuerit eius qui debet perferre, ad hoc ducere convenit. Sic et evacuationes quae ad extremum ducunt periculosae, et rursus refectiones quae in extremo fuerint periculosae.

4

Victus tenuis et exquisitus in morbis longis semper, et in acutis ubi non convenit, periculosus. Et rursus qui ad extremam tenuitatem devenit victus gravis est; et repletiones quae ad extremum deveniunt graves sunt.

5

In tenui victu aegri delinquunt, quo fit ut magis laedantur; quicunque enim error committitur, magnus maior fit quam in paulo pleniore victu. Propterea et sanis periculosae valde tenues constitutae et exquisitae victus rationes, quia errores difficilius ferunt. Propter hoc igitur tenues et exquisiti victus plerumque magis periculosi quam paulo pleniores.

6

Extremis morbis extrema exquisite remedia optima sunt.

7

Ubi morbus peracutus est, extremos statim habet labores, et extremo tenuissimo victu uti necesse. Ubi vero non, sed pleniorem victum admittit, tanto plenior adhibendus quanto morbus ab extremis est mollior.

8

Quando morbus in vigore est, tunc tenuissimo victu uti necesse est.

9

Coniectari autem oportet an aeger victu sufficiat ad vigorem morbi, et utrum ille prius deficiat et non sufficiat, an morbus prius deficiat et hebetetur.

10

Quibus igitur statim morbus vigent, statim tenuiter victitandum; quibus vero posterius vigor, in ipso et paulo ante ipsum subtrahendum; ante vero plenius exhibendum ut aeger sufficiat.

11

In exacerbationibus abstinere oportet, nam adiicere nocet; et quibuscumque per circuitus fiunt exacerbationes, in ipsa exacerbatione abstinere oportet.

12

Exacerbationes vero et constitutiones morborum indicant et anni tempora et circuituum ad invicem incrementa, sive quotidie alterna sive longiori tempore fiant. Sed et ex iis quae mox apparent indicia

supervenientia quemadmodum in morbo laterali di-
cto sputum initio statim apparens morbum
breviat, si postea postea apparuerit producit
Urinae et alvi excrementa et sudores vel bene
morbos iudicaturos vel malam hor-
breves aut longos morbos fore appar-
entia ostendunt

13

Senes facillime ieiunium tolerant, secundo loco ae-
tate consistentes habent, minus adolescentes,
omnium minime pueri, et ex his qui inter ipsos
sunt alacriores.

14

Qui crescunt plurimum habent calidi innati;
plurimo igitur egent alimento, alioquin
corpus absumitur. Senibus vero parum caloris
inest, ideo paucis fomitibus egent,
nam a multis extinguitur calor; et
ob hanc causam febres senibus non similiter acutae,
frigidum enim est eorum corpus.

15

Ventres hyeme et vere natura calidissimi
sunt et somni longissimi; quare per ea
tempora alimenta copiosiora sunt exhi-
benda; etenim tunc calor innatus plurimus
est, ideo pleniore egent alimento;
indicio sunt aetates et athletae.

16

Victus humidus febricitantibus omnibus con-
fert, maxime vero pueris et aliis qui tali
victu consueverunt.

17

Et quibus semel aut bis, et pluries aut
paucius et particulatim; concedendum aliquid
consuetudini, tempori, et regioni, et
aetati et consuetudini.

18

Aestate et autumno cibos difficillime ferunt,
hyeme facillime, secundo loco ver habet.

19

His qui per circuitus accessiones habent
nihil dare neque cogere oportet, sed de
adiectionibus detrahere ante iudicationes.

20

Quae iudicantur et iudicata sunt integre
neque movenda neque novandum aliquid
sive medicamentis sive aliis irritamentis,
sed sinere

21

Quae ducere oportet, quo maxime vergunt,
eo ducere per loca conferentia ducenda.

22

Concocta medicari oportet et movere,
non cruda, neque in principiis, nisi
turgeant; plurima autem non turgent.

23

Quae excernuntur non multitudine aesti-
manda, sed si talia excernantur qualia
conveniunt, et facile ferat; et ubi
oportet usque ad animi defectionem
ducere, id quoque faciendum si aeger potest
tolerare

24

In acutis passionibus raro et in prin-
cipiis medicamentis purgantibus utendum, et
hoc praemeditate faciendum.

25

Si qualia oportet purgari purgentur,
confert et facile ferunt; contra difficulter.

Sectio secunda

1

In quo morbo somnus laborem facit, mor-
tale; si vero iuvat, non mortale.

2

Ubi somnus delirium sedat, bonum.

3

Somnus et vigilia, utraque si modum
excesserint, malum.

4

Non satietas, non fames, neque aliud
quidquam bonum quod naturae modum excesserit.

5

Spontaneae lassitudines morbos pro-
nuntiant

6

Quicumque dolentes parte aliqua corporis omnino
dolores non sentiunt, iis mens aegrotat.

7

Quae longo tempore extenuantur corpo-
ra lente reficere oportet, quae vero
brevi, breviter.

8

Si a morbo cibum assumens quis non ro-
boratur, corpus pluri alimento uti
indicat; si vero cibum non sumenti
hoc eveniat, evacuatione indigere
sciendum est.

9

Corpora quae purgare volueris
oportet fluida facere.

10

Impura corpora quanto plus nutriveris tanto
magis laedes

11

Facilius est impleri potu quam cibo

12

Quae in morbis post crisim relinquuntur reci-
divas facere consueverunt

13

Quibus crisis fit his nox quae accessionem
praecedit gravis quae vero subsequitur
levior plerumque esse solet

14

In profluviis alvi mutationes excrementorum
iuvant nisi in deteriora mutentur

15

Ubi fauces aegrotant aut tubercula in corpore
nascuntur excretiones inspicere oportet
nam si biliosae fuerint una et corpus aegrotat
si vero similes sanis fuerint tuto cor-
pus alere poteris

16

Ubi fames laborare non oportet

17

Ubi cibus praeter naturam copiosior in-
gestus est hic morbum facit quod ostendit
curatio

18

Eorum quae nutriunt confertim et celeriter
celeres etiam fiunt deiectiones

19

Morborum acutorum non omnino certae sunt
praedictiones neque mortis neque salutis

20

Quibus per iuventutem alvi humidae
sunt eis senescentibus siccantur. quibus vero
in iuventute alvi siccae sunt his senescentibus
humectantur

21

Famem vini potatio solvit

22

Morbos qui ex repletione fiunt curat eva-
cuatio et eos qui ex evacuatione rep-
letio et aliorum contrarietas curatio
est

23

Morbi acuti iudicantur intra dies
xiiii

24

Quartus septimi index. secundae septi-
manae octavus initium. spectandus quo-
que undecimus hic enim quartus est secundae
septimanae. spectandus est rursus quartus
decimus hic enim quartus est a quartodecimo
septimus ab undecimo

25

Aestivae quartanae plerumque solvuntur breves
autumnales vero longae et maxime quae
ad hyemem pertingunt

26

Febrem convulsioni supervenire melius est
quam febri convulsionem

27

Iis quae non ex ratione sublevant non
oportet fidere neque multum formidare
mala quae praeter rationem eveniunt. plu-
rima enim horum incerta sunt nec admodum
permanere aut longo tempore durare con-
sueverunt

28

Febricitantibus non omnino leviter corpus sibi
constare nec minui aut etiam supra
modum colliquescere malum. illud enim significat
morbi longitudinem hoc vero imbecil-
litatem significat

29

Incipientibus morbis si quid movendum videtur
move vigentibus quiescere melius est aut eis mutandum
et quietem habere

30

Circa initia et fines morbos remissiora
sunt omnia circa vigorem vero vehemen-
tiora

31

Si a morbo bene comedenti corpus non
proficit malum

32

Omnes qui male se habent principio
cibum bene appetunt nec quidquam profi-
ciunt in extremis rursus cibos non app-
etunt. qui vero ab initio cibos valde
non appetunt postea vero bene appetunt
ii melius evadunt

33

In quovis morbo mentem valere et bene
se habere ad ea quae offeruntur bonum
contrarium vero malum

34

In morbis minus periclitantur quorum
naturae aut aetati aut habitui aut tempori
magis conveniens morbus quam quibus in
nullo horum congruit

35

In quovis morbo partes umbilicales et imum ventrem alimentum crassitudinem habere melius est, valde vero extenuari ac [illegible] malum, [illegible] ad inferiores purgationes periculosum.

36

Qui salubriter corpus habentes per medicamenta evacuati cito exsolvuntur et qui pravo utuntur victu.

37

Qui bene se habent corpore difficulter ferunt medicationes.

38

Parum deterior potus aut cibus suavior autem melioribus quidem sed insuavioribus praeferendus.

39

Magna ex parte senes iuvenibus leviter aegrotant. Qui vero morbi ipsis continui longi plerumque ipsos ad mortem comitantur.

40

Raucedines et gravedines in valde senibus concoctionem non admittunt.

41

Qui saepe et vehementer absque causa manifesta animo linquuntur, ii derepente moriuntur.

42

Solvere apoplexiam vehementem impossibile, debilem vero non facile.

43

Ex iis qui strangulantur et dissolvuntur, nondum tamen mortui sunt, non revertuntur quibus spuma circa os extiterit.

44

Qui natura admodum crassi sunt citius intereunt quam graciles.

45

Qui morbo comitiali laborant mutationem maxime aetatis et temporis et locis [illegible] liberantur.

46

Duobus doloribus simul non eundem locum infestantibus vehementior obscurat alterum.

47

Dum pus conficitur, dolores ac febres accidunt magis quam iam confecto.

48

In omni corporis motu ubi fatigari coeperit quies statim lassitudinem levat.

49

Consueti solitos labores ferre, etiam si debiles aut senes sint, insuetis robustis et iuvenibus facilius ferunt.

50

Consueta a longo tempore, etiam si deteriora fuerint, insuetis minus molestare solent; oportet vero etiam ad insueta mutationem facere.

51

Plurimum atque repente evacuare vel replere vel calefacere vel refrigerare vel quovis alio modo corpus movere periculosum; quoniam omne nimium naturae inimicum; quod vero paulatim fit tutum est, tum alias, tum si ab altero ad alterum transitur.

52

Omnia secundum rationem facienti si non succedant secundum rationem, non transeundum ad aliud manente eo quod ab initio visum sit.

53

Qui magno alvo humidas habent si iuvenes sint melius degunt quam qui siccas habent; ad senectutem vero deterius degunt, siccantur enim plurimis senescentibus.

54

Magnitudo corporis iuventuti liberalis ac non iniucunda, senectuti vero inutilis et deterior parvitate.

Sectio Tertia

1

Mutationes temporum potissimum pariunt morbos et in ipsis temporibus magnae mutationes aut frigoris aut caloris et alia pro ratione eodem modo.

2

De Medicamentis facile Parabilibus
Seu de Medicina Pauperum

Quicumque medendi arte claruerunt atque ex humanae salutis custodia magnam sibi apud omnes gratiam comparaverunt, prima existimationis suae fundamenta in pauperum tabernis iecisse videntur. Cum enim Medicum duo praecipue commendent, medendi peritia et in aegros charitas [illegible] alienae calamitatis tanta commiseratio quae ad ferendum auxilium anxie quemque sollicitet. Utrumque est [illegible] atque principaliter facile probari [illegible] medicinae, [illegible] frequenti pauperum medicatione se talem esse prius ostenderit. nam quibus res illa omnes [illegible] quam pecunia [illegible] reddit [illegible] minus charitati suspecta est mederi incipientium peritia quae multis experimentis ac [illegible] observationibus popularium hominum testimonio [illegible] nos innotuerit [illegible] [illegible] quos [illegible] morbi [illegible] [illegible] qui multa [illegible] aliquando [illegible] atque [illegible] humani [illegible] dedicavit. [illegible] causa est medicamentis [illegible] atque [illegible] [illegible] [illegible] quae [illegible] primis [illegible] esse debeat. Ut bene medendi praecepta [illegible] studio [illegible] [illegible] applicare [illegible] [illegible] primas [illegible] [illegible] [illegible]. [illegible] Medici [illegible] [illegible] alimenta. Sed [illegible] accommodata ad sanationem medicamenta [illegible] pharmacopolarum officinis nihil peti posset ne [illegible] pauperitati [illegible] infligatur [illegible] miseria [illegible] fiat accessio. [illegible] tamen [illegible] liberalitas pauperes [illegible] multa medicamentorum materias [illegible] obvias sunt [illegible] parvo et [illegible] [illegible] [illegible] medicinis [illegible] conveniunt [illegible] medicat [illegible] remedia [illegible] pauperibus quam necessaria [illegible] [illegible] pharmacopoeis frequentibus [illegible]. De iis ergo remediis quae facile parabilia [illegible] [illegible] tractatus in duas [illegible] partes quarum altera [illegible] medicamentorum [illegible] omni [illegible] [illegible]. altera [illegible] singula [illegible] [illegible] singula [illegible] parandi [illegible] [illegible] potuerint.

Pars prima

In recensendis medicatis [illegible] convenientissimum ordo existimavi remediorum methodo inventorum ut sciat unusquisque promptè invenire materiam [illegible] principio aut progressu morbi adhibendam. Cum itaque remedium a causa morbi indicatum inventione quidem ultimum sed executione primum debeat, quae ante omnia tolli causa ut morbus tandem expugnari possit, methodi caput in [illegible] merito vendicabunt medicamenta eradicantia causam morbificam quae variantur pro varietate causae. alia enim majori copia peccantem primunt, variant quo alia deficientem augent. alia pravam ejusdem qualitatem corrigunt. alia inhibent motum intempestivum aut vitiosum quietem ad motum aliumque motum revocant. alia denique causas toto genere [illegible] naturam substantialiter [illegible] peccantes extirpant.

A variantibus exordiendum eo quod [illegible] quod pauperes [illegible] plurimis abundant excrementis quam [illegible] ac [illegible] de [illegible] frequentius [illegible] ex plenitudine.

Variantia porro alia manifeste evacuant sensibiliter per alvum vomitum urinam sudorem sputum palatum [illegible] alia insensibiliter digerunt [illegible] quibus in evacuatione locus est [illegible] sensibilem evacuationem.

Variantia per Alvum

Alia corripiunt [illegible] primarum viarum [illegible] inferiorem regionem [illegible] evacuant clementia dicuntur.

Alia secundam [illegible] regionem [illegible] expurgant purgantia ac Cathartica appellantur.

Alia lenitiva sunt assumpta per os injecta per clysteres et suppositoria glandibus. [illegible] alia ventrem [illegible] laxant [illegible] alia debilius agunt [illegible] naturalia [illegible]

De Morbis Puerorum & Virginum & Dentitione

Cur Pueri tam variis morbis afficiuntur

Quinque autem horum effectus enumerat Hippocrates Lib. de octimestri partu quorum

1a est Labor quem in exitu per angustum meatum sustinent

2a Mutatio insolitis quam varii sequuntur dolores & inflammationes

3a inassuetudo frigidi humidi aeris

4a diversitas nutrimenti

5a quod asperius [illegible] tractantur [illegible] quam is [illegible]

Virginales aut morbi dicuntur non a virginitate quam [illegible] agendi habet [illegible] efficiendi [illegible] sed [illegible] & accidentaliter ut quia [illegible] illi per [illegible] [illegible] [illegible] ut [illegible] in hac aetate ut quia [illegible] retentio causa morborum esse potest

De Dentitione

In hac duo sese offerunt affectus explicandi

Odaxysmus quem Galenus omnesque & alii antiqui definiunt pro pruritum quendam gingivarum cum levi molestia aut vehementi dolore

Odontiasis quam graeci ὀδοντοφυΐαν nos dentitionem appellamus [illegible] iam nascentis & concepti dentes gingivam [illegible] 1a circa septimum mensem [illegible] [illegible] aut anno 7o quia tunc [illegible] dentium [illegible] cum dolore

De Variolis & Morbillis

Nomen

Omnes tumorum eruptiones quae fiunt in cute Graeci vocant exanthemata seu extuberantia [illegible] efflorescentiae. Latini veteres [illegible] [illegible] pustulas appellarunt papulas in genere, sed illas quae in pueris magna [illegible] [illegible] Arabes & praesertim Avicenna appellaverunt Variolas & morbillos.
Variolas quidem dixerunt ob similitudinem quam habent cum minutis illis pustulis quae oriuntur in vario ob [illegible] raritatem et humiditatem & [illegible] ab italis vocantur [illegible] [illegible] vocantur ab illis.
a gallis vero petite verolle ad differentiam magnae luis gallicae quae ab illis in [illegible] vulgo [illegible] appellatur Picote.
Morbilli autem dicuntur quasi parvi morbi non quidem [illegible] essentias [illegible] sunt symptomata subsequentia febrem malignam & contagiosam, sed ratione parvi[illegible] maculas [illegible] [illegible] parvae cutis efflorescentiae similes [illegible] stimulis [illegible] [illegible] vocantur la Rose ou la Rouge[illegible] ob maculas rubras.

Definitio essentialis

Cum [illegible] affectus [illegible] considerari possunt 1° Ut sunt symptomata febris epidemicae [illegible] contagiosae & [illegible] 2° [illegible] [illegible] variationes naturae [illegible] [illegible] [illegible] [illegible] 3° [illegible] maculae eminentes & pustulae [illegible] quae ratione [illegible] parvae [illegible] [illegible] [illegible] morbi rationem habere possunt [illegible] variolas & [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] modo [illegible].
Sunt igitur pustulae parvae [illegible] [illegible] in corpora [illegible] [illegible] [illegible] naturae [illegible] in febre maligna & contagiosa [illegible] dolorem & [illegible] [illegible] materia.
Morbilli autem sunt exanthemata seu efflorescentiae quae [illegible] sunt in [illegible] [illegible] [illegible] & natura [illegible] in febre & [illegible] dolore [illegible] [illegible] suppuratione & eminentia quales apparent in febribus purpureis.

Differentia inter variolas & morbillos

Licet hi duo affectus in pluribus conveniant [illegible] in [illegible] [illegible] [illegible] [illegible] in eruptionis modo [illegible] natura [illegible] in febre epidemica [illegible] [illegible] & aliis. Differunt tamen in quibus
1° de qualitate [illegible] quia variolae fiunt de sanguine [illegible] & [illegible] [illegible] & abundantiori; Morbilli autem de [illegible] & tenuiori.
2° ex eiusdem quantitate quia variolae erumpunt in insigni eminentia — Morbilli vero [illegible] & [illegible] [illegible] efflorescentia.
3° [illegible] quia variolae [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] Morbilli non item.
4° ratione [illegible] quia variolae suppurantur, Morbilli resolvuntur.
